## Exam Strategy

The key things to remember are:

Divide the time up according to the mark allocations, leaving plenty of time to address the 20 mark question at the end.

In the questions using sources, refer to specific details in the sources and use quotes as appropriate.

Use specific knowledge to back up the points made in the answers. Don't be vague and generalise.

## Notes

The format of the questions will be the same as the questions practised in class.

The questions could be on any aspect of life in Germany between 1919 and 1939. So the key to success will be to break down the topics into manageable chunks in the weeks leading up to the examination.

We will provide support and suggestions as to how best to do this.

## Past Papers

Because it is a new syllabus there are at present only a few exemplar examination papers which are in the process of adapting and expanding. The newly published revision guides do however contain some really useful practice answers and commentaries on how to pick up the most marks!
