

Friday 26<sup>th</sup> June 2020

Dear parents/carers,

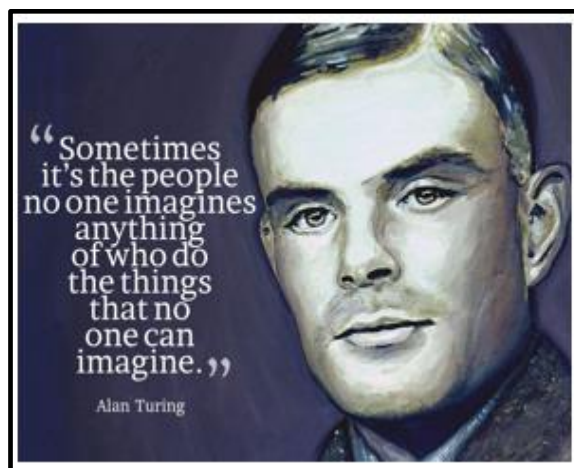

**iWeek goes on line Monday July 6<sup>th</sup>**

The last 15 weeks have without a doubt been very challenging for all of us. I want to express my deepest gratitude to you for the support that you have given to your child throughout and the support you have shown to myself and my staff. Pupils are in good routines and there is plenty of traffic of exciting work and projects that Year 7 have been sharing. Thank you for encouraging your child's participation in the range of activities that staff have been creating and posting in the weekly newsletter.

I am very conscious that Year 7 having had so little of the QB experience this year. I was delighted when the Maths Team suggested that we try to roll out an iWeek experience in the last two weeks of term! Subjects included in iWeek activities - Maths, English, Science, RE, History and Art. All other subjects will continue on line as normal.

**A message from Ms Grant Head of Maths**

'In normal circumstances, year 7 would be embarking upon their final iweek of the year and so in true Queensbridge style several subjects have teamed up to provide an iweek style virtual experience. Throughout the final two weeks of term, year 7 will delve deep into the activities that took place at Bletchley Park during WWII – the top secret home of the World War II codebreakers. Our pupils will turn their hand to code breaking in maths, learn the science behind the secrecy in their science lessons, discover the legacy of Alan Turing in English and much much more. Pupils will keep to their normal online school timetable, but will discover the history behind Bletchley Park, Alan Turing and WWII. An introductory film will be launched on Monday 6 July.'

I hope that your child will enjoy these activities working across different subjects and once again thank you for your support.

**Yours sincerely,**

**Mrs H Reeves**  
Headteacher Queensbridge School
